## Carlson vs AutoCAD Civil 3D

September 2, 2009

This conversation heated up after I made a post to a thread on an Autodesk Discussion Group. Since then we've started a valuable conversation about the strengths and weaknesses of both programs.

My response and the original discussion group thread can be found here: <u>Carlson Vs 3D</u>

Now, James Wedding of <u>www.civil3d.com</u> fame has started a thread on his website asking his readers to comment on the validity of my post <u>Why I Chose Carlson Over Civil 3D</u>.

James' post is here: <u>View from the Other Side: Why I Chose</u> <u>Carlson Over Civil 3D</u>

Keep watching this space for updates. I'm interested to see what James' readers have to say and will respond in a week or so.

**Update 9/12/2009:** I've posted my response to the comments from both www.civil3d.com and the Autodesk Discussion Group
