Carlson Point Cloud and the “Point Cloud Complete” Bundle – $6,795

May 1, 2010
It’s time to take another look at Carlson Point Cloud.

Carlson’s Point Cloud program has been re-vamped with many powerful and exciting new features giving those folks struggling to process data generated from laser scanners the ability to process up to 1 billion points.

Carlson Point Cloud is even more valuable to land surveying, civil engineering and mining professionals because of its seamless integration with Carlson Survey, Carlson Civil and Carlson Mining.

With the new and improved Point Cloud program, your scan can be oriented to a local coordinate system and clouds can be “cleaned” to filter and thin out duplicate points. You also have the ability to snap to edges and code points for use with the Field to Finish feature of Carlson Survey. This

allows you to define more accurate breaklines and create better surface models for generating contours, profiles & cross sections in Carlson Civil.

Starting on May 1, 2010, That CAD Girl is offering the “Point Cloud Complete” bundle that includes Carlson Survey, Civil, Survey, GIS and Point Cloud for $6,795.

To schedule a live, online or on-site demonstration, contact us at 919.417.8351 or contactus@thatcadgirl.com.
