

That CAD Girl

North Carolina Surveyors Convention – Greensboro NC

January 26, 2012

Come visit us next week at our booth at the [North Carolina Surveyors Convention](#) at the Koury Convention Center in Greensboro NC. We'll have the new [Carlson Supervisor+ RTK GPS tablet](#) available for you to test drive and you can learn how to use Carlson's field software to collect GIS data that meets the criteria and that will import directly into Esri GIS software.

I will be teaching a concurrent session from 10:00-11:00 on Friday 2/3 on the topic of Carlson Software and GIS.

Also, if you're brave enough, come by to take a quick CAD test – top scores eligible for great prizes!
