That CAD Girl

New Carlson Build - 120219

February 23, 2012

Carlson released a new build of their desktop software earlier this week. This includes updates to the IntelliCAD/for AutoCAD versions of <u>Survey</u>, <u>Civil</u>, <u>Hydrology</u>, <u>GIS</u>, Basic Mining, Geology, Underground Mining, Surface Mining, Natural Regrade, Field, <u>Takeoff</u>, <u>Construction</u> and <u>Point Clouds</u>.

To confirm your current build number, go to Help > About Carlson. You'll see the build number on the top line of the text box.

You can download the latest full version or updates to your current installation here.

If you would like to try out any of the Carlson Software products for 30-days, <a href="mailto:emailto

For those anxious to try out the very latest and greatest updates in the testing versions of IntelliCAD 7.1, you can also <u>send me an email</u> to gain access to a new blog, "The Little CAD Engine That Could", administered by Leonid Entov

That CAD Girl

of Carlson Software.

Participation in the testing and access to the blog is by invitation only, so $\underline{\text{email me}}$ and I'll pass along your request.
