Carlson Software and Windows 8

January 12, 2013

Now that many (most? all?) new computers are shipping with [Windows 8](#), [Carlson Software](#) users are curious whether or not their software will run on the new operating system.

I recently asked Carlson's tech support team about the compatibility of Carlson with Windows 8 and received the following response:

At this time, Carlson 2013 is not officially supported on Windows 8. However, testing we have done on Windows 8 has been largely successful with the following observations:

- *If Carlson installs cleanly without error, it should run correctly.*
- *In some cases, you may encounter install errors. We are currently addressing these issues for Carlson 2013 products – these updates will be available in the next builds that we post.*

That CAD Girl

- *Older Carlson products will remain AS IS – we will not be updating the installs. But again, but if a given product installs without error, it should run fine.*
- *As a general rule, products supported on Windows 7 should run on Windows 8.*
- *It has been our experience that using the “compatibility mode” option is not recommended.*
