[Robert Green](#) seems to have answers for everything – if you haven't [subscribed to his CAD Manager Newsletter](#) yet, you should!

Here, in [How Will You Buy CAD Software in 2016?](#), he tackles Autodesk's move to a Subscription only (rental) distribution model and encourages everyone to prepare for the transition now.

The only quibble I'd have is with this quote:

Anyone who has been through the Land Desktop transition to Civil 3d should understand that statement is probably best
