## Overview of Carlson CADNet webinar – Working with Images & Converting to Linework

November 29, 2015

One of [Carlson's Year-End Specials](#) this year is for existing Carlson users to add Carlson CADNet for \$995 – the retail price is \$1,595 and maintenance is an additional \$159.50. (Hint: I provide additional discounts for existing and new customers!)

Understandably this has generated a lot of renewed interest in this module. I have received a lot of calls and emails from folks requesting more information and wondering if, and how, CADNet might increase your productivity. So, in response, I've decided to post the recording of my October 8, 2015 webinar on the topic, "Overview of Carlson CADNet – Working with Images & Converting to Linework".
