

That CAD Girl

Need a little Carlson Software? Need a lot? Carlson's Select Suite lets you buy what you need!

September 3, 2019

Purchase includes a year of That CAD Girl Live Webinar Training

I'm late posting this but, several months ago, Carlson

That CAD Girl

announced a welcome addition to their desktop software “bundling” options.

Prior to this announcement, users only had options of buying individual modules or one of two different Carlson Software bundles: [Carlson Civil Suite](#) which includes [Survey](#), [Civil](#), [GIS](#) and [Hydrology](#) or [Takeoff Suite](#) which includes [Construction](#), [CadNet](#), [GeoTech](#) and [Trench](#).

But, now? Now you can create your own [Select Suite of 2, 3, 4, 5 or 6](#) different modules and receive discounted pricing for the original purchase and the annual maintenance. The modules available in the Select Suite are: [Survey](#), [Civil](#), [GIS](#), [Hydrology](#), [Point Cloud Basic](#) and [CadNet](#).

All the modules come with an included license of IntelliCAD or can be installed on top of your own, separately purchased license of AutoCAD. The modules can also be shared as a network license if needed.

Pssstttt... [All Carlson products still include a perpetual license agreement](#) so, if you like your software, you can keep it!
