## Working Remotely with Your Carlson Software

April 15, 2020

These days, everyone is having to be creative in finding ways to work from home or other remote location.

For standalone licenses, Carlson Software's licensing agreement allows users to install on two computers for your personal use. You can see more in this [FAQ: Can I install my Carlson desktop software on two computers?](#)

If you own network licenses, you have the ability to "check out" a license to a remote computer. See this [FAQ: Working with Carlson's network license manager](#) for help.

Carlson's support team is working remote and is fully operational if you run into any problems.

Stay safe out there!
