I'm a civil engineer. What software do I need?

August 23, 2015

Primarily you'll probably need Carlson [Civil](#) and [Hydrology](#) but [GIS](#) has a lot of nifty tools for importing images so you may also consider that program a "need" instead of just a "want" as well.

Since all three of these modules are included in the Carlson [Civil Suite](#), that's usually the better deal.
