What is the latest and greatest version/build of my Carlson Software? (a running thread)

July 29, 2016

New versions of most Carlson Software desktop products are released on an annual basis (Civil Suite 2016, Takeoff 2016, Takeoff R8, etc) and Carlson field software every 1-2 years (SurvCE 4.0, SurvPC 5.0, etc). However, in between these major releases Carlson will post patches called “Builds” that fix bugs or errors that have been found since the initial release.

If you are having trouble or suspect you have found a bug, the first thing to do is make sure you have the latest “Build” installed for your version of software. [This FAQ shows how to find the Build Date](#) of the software you have installed.

That CAD Girl

Next, you'll want to visit [Carlson's downloads page](#), specify your program and version, and see if a newer Build is available.

With the addition of this FAQ feature on my website I am going to keep this post as a "running thread" and will add to and update it as new Builds are posted. However, you can always visit Carlson's site to confirm the version shown here is the latest and greatest available.

This can be installed on AutoCAD or with included Intellicad.

The following modules are included: Survey, Civil, Hydrology, GIS, Basic Mining, Geology, Underground Mining, Surface Mining, Natural Regrade, Field, CADnet, GeoTech, Trench, Construction and Point Clouds.

Version	Build Date
2023	2/11/2023
2023	11/77/2022
2023	11/7/2022
2022	10/11/2022
