Did you know... How easy it is to spruce up your dimensions?

March 12, 2012

Anyone who has worked with AutoCAD for any length of time can usually create a standard dimension object. However, if you pay close attention to two items in the Object Properties dialog box, you can get very creative with the way simple dimensions are displayed.

For instance, in the image just below, you can see that there are two Object Properties items highlighted in yellow. One is the "Measurement" and the other is the "Text override". The Measurement is the measured distance between the dimension definition points (DEFPOINTS) and is read-only. You can also see that the current value for Text override is "< >". Whenever the less-than and greater-than signs are shown as the Text override value, the Measurement will be substituted for the symbols when displayed in the drawing.

That CAD Girl

Text position X	218.1896
Text position Y	4.7700
Text rotation	0.0000
Text view direction	Left-to-Right
Measurement	81.0000
Text override	< >

To add just a little more detail to the dimension, you can add descriptive text before or after the “< >” in Text override as shown in the next example below. As long as you keep the “< >”, the correct measured distance will always be displayed as part of the dimension text:

Text position X	69.3555
Text position Y	-15.5952
Text rotation	0.0000
Text view direction	Left-to-Right
Measurement	81.0000
Text override	< > - 9 SPACES

A

nd, making it fancier... In the example below, I have added a “P” between < > and “9 SPACES”. This is like pressing Enter to go to a second line and has the effect of stacking two lines of text above the dimension line:

That CAD Girl

And, finally, one more option. Rather than entering “P”, if you enter “X” as part of your Text override, you will stack the text partially above and partially below the dimension line.

T

he “P” and “X” modifiers can also be used in combination to create 3 or more lines of text and allowing you to control how many lines appear above and how many appear below the dimension line.

Carlson SurvPC Data Collection Now Works with Esri & MicroStation Files

March 12, 2012

With a post to their blog last night, Bruce Carlson announced that [Carlson SurvPC data collection software](#) (Windows version of [SurvCE](#)) can now view and write directly to the [Esri](#) .mxd and [Bentley Microstation](#).dgn file formats. This is pretty exciting stuff for both survey field crews and those who wish to design-on-the-fly from the field.

Tips & Tricks for Setting Points in Carlson – Webinar

March 12, 2012

Yeah, you know all of them already... Unless you don't!

Carlson has a lot of great tools that are available for setting points but some of them are a little hidden. I will be covering some features in Carlson Survey and Carlson Civil that will, hopefully, help you increase your productivity.

[Register Now! Wednesday, February 29th – Tips & Tricks for Setting Points in Carlson](#)

Carlson Boot Camp Training

That CAD Girl

in New Jersey – Approved for PDH Credit

March 12, 2012

I just received word from the NJ State Board of Professional Engineers & Land Surveyors that our Woodbridge classes will be accepted for continuing education credit. Our full list of upcoming classes in Columbus Ohio, Chicago Illinois and Upstate South Carolina can be found [here](#).

[Boot Camp! Carlson Survey & Field to Finish – April 10, 2012 – Woodbridge, NJ](#)

[Boot Camp! Surface Modeling – April 11, 2012 – Woodbridge, NJ](#)

Temporary Overrides?

March 12, 2012

There are others, but my two favorites are:

- Holding **Shift** while in a Draw or Modify command allows you to override your current ORTHO setting.

So, if you're drawing a line and ORTHO is Off, holding **Shift** will temporarily turn ORTHO On. As soon as you let up on the **Shift** key, ORTHO will be Off again. Likewise, if ORTHO is On, holding **Shift** will temporarily turn it Off.

- Holding **Shift** while in the Fillet command allows you to override your current Radius setting and apply a Radius of 0.0 between the two selected entities.

So, if you're drawing a parking lot and find yourself constantly changing your Fillet Radius between 0.0 and another value to create both sharp and rounded corners, leave the Radius set to something other than 0.0 and just hold **Shift** when you pick the two entities to apply a 0.0 Radius.

That CAD Girl

These Temporary Overrides are available in all “flavors” of AutoCAD as well as in [IntelliCAD](#).

Job Opening – Piedmont Triad Region, North Carolina

March 12, 2012

One of my clients has an immediate opening for a CAD/GIS Technician.

[Click here for a full job description](#)

If you are interested, please submit your resume **plus a copy of [this job description](#)** to ContactUs@ThatCADGirl.com and I will forward it along.

IntelliCAD Webinar – Do Over

March 12, 2012

Last week I presented a webinar sponsored by [Carlson Software](#) on the topic “Updates and Overview of IntelliCAD 7”. Unfortunately we had some technical difficulties and didn’t get a complete recording to post to the [Movies collection](#) on Carlson’s website.

For those who are interested, we will be re-doing the webinar on Thursday, March 29th. By that time we expect to have additional updates and improvements to announce.

[Keep an eye on this site to register for the next IntelliCAD webinar](#)

You can register for these future webinars by clicking the link below:

CAD Test – NC & SC Surveyors Edition!

March 12, 2012

Congratulations to Keith Garrison who won the software giveaway at the [NC Surveyors Conference](#) and to Xan Holland who won at the [SC Education Conference and Trade Show](#).

We had a CAD Test with 25 questions for attendees to test their wits and the first person to get 100% or the high score won a free copy of [Carlson Survey 2012 with IntelliCAD](#). Keith got a high score of 88% in Greensboro and Xan tied with Greg Flowe at 84% in Columbia. Xan and Greg went through two rounds of tie-breakers before Xan was declared the winner.

Look for our booth at the [SC Engineering & Surveying Conference](#) in June 2012 to test your CAD skills!

New Carlson Build – 120219

March 12, 2012

Carlson released a new build of their desktop software earlier this week. This includes updates to the IntelliCAD/for AutoCAD versions of [Survey](#), [Civil](#), [Hydrology](#), [GIS](#), Basic Mining, Geology, Underground Mining, Surface Mining, Natural Regrade, Field, [Takeoff](#), [Construction](#) and [Point Clouds](#).

To confirm your current build number, go to Help > About Carlson. You'll see the build number on the top line of the text box.

[You can download the latest full version or updates to your current installation here.](#)

If you would like to try out any of the Carlson Software products for 30-days, [email me here](#).

For those anxious to try out the very latest and greatest

That CAD Girl

updates in the testing versions of IntelliCAD 7.1, you can also [send me an email](#) to gain access to a new blog, “The Little CAD Engine That Could”, administered by Leonid Entov of [Carlson Software](#).

Participation in the testing and access to the blog is by invitation only, so [email me](#) and I’ll pass along your request.

Did you know... About the “Mid Between 2 Points” OSnap?

March 12, 2012

It hasn’t been around forever, but this Object Snap is such a handy little tool you’ll wonder how you ever managed to live without it! The best news is that it’s available both in AutoCAD and IntelliCAD.

Whenever you’re prompted to “Specify a point:”, you can enter

That CAD Girl

“M2P” at the Command: line or you can hold your shift key + right-mouse to display the pop up box and select “Mid Between 2 points” option. This allows you to snap to the MidPoint between two other points. The pop up box is shown below.

That CAD Girl

Next you'll be prompted to specify two new points for which you can use additional OSnap settings. The example below shows a new line that starts at the Midpoint between the ENDpoints of the two existing lines.
