Overview of Carlson CADNet webinar – Working with Images & Converting to Linework

November 29, 2015

One of Carlson's Year-End Specials this year is for existing Carlson users to add Carlson CADNet for $995 – the retail price is $1,595 and maintenance is an additional $159.50. (Hint: I provide additional discounts for existing and new customers!)

Understandably this has generated a lot of renewed interest in this module. I have received a lot of calls and emails from folks requesting more information and wondering if, and how, CADNet might increase your productivity. So, in response, I've decided to post the recording of my October 8, 2015 webinar on the topic, "Overview of Carlson CADNet – Working with Images & Converting to Linework".

That CAD Girl

Click here to request a custom proposal for adding CADNet to your existing license, for a new “Super-Sweet-Suite” that includes Survey, Civil, Hydrology, GIS AND CADNet or other Carlson software or hardware products.

Click here to request a custom proposal.

Click here to learn more about my webinar series that’s included with every software purchase – We help you buy what you need AND use what you buy…

It’s been a fun (and busy!)

few weeks…

November 29, 2015
Thanks to everyone who attended our workshops in Statesville & Hendersonville this month! We were pretty much busting the seams of our event space in Hendersonville and we'll be better prepared for the crowd next year. I think it's safe to say we'll be back for a full day.

Here are a few snapshots of me and "the crew" who helped create this 3-ring circus.

From left: Jeremy Taylor, aka "That CAD Guy"; Mark Long, Civil & Hydrology Training and Support for Carlson Software; me; Scott Griffin, National Civil Sales Director for Carlson Software; Butch Herter, Director of Hardware for Carlson Software and Mike Jones, Inside Sales Support for Carlson Software.

Pardon the smirks – a crude comment was made instead of just

saying “Cheese!”

Yeah, this is a little more honest.

I think we were at the end… of the day.

That CAD Girl

Tuesday in Statesville

Tiny bit of false advertising.

That CAD Girl

This is Jeremy, That CAD Guy, explaining the ins-and-outs of Traverse Adjustment in Carlson Survey.

Feel like you missed out? There’s still time to register for our encore presentations in Raleigh in mid-December. [Click here to find out more]

Christmas comes early… Carlson just announced their year-end specials!

November 29, 2015

Well, it ***says*** November 1st but I just received an email that they've launched this promotion today to coincide with a magazine advertisement! I know a lot of you have been waiting

for this promotion and it's finally here.

For a limited time I'm also offering a special "build-your-own-suite" package that will allow you to choose any 4 of these programs to create the bundle that works best for you: Survey, Civil, Hydrology, GIS, CADNet, Trench or GeoTech.

You can request a custom proposal if you're interested in the "build-your-own-suite" or visit my online store here to purchase the standard Civil Suite and maintenance.

Remember, all purchases through That CAD Girl make you and

your co-workers eligible for a year of our live, interactive webinars (see list of upcoming topics here) so you won't simply be left on your own to learn a new software. Documentation of attendance will be provided so you may also receive PDH credit from your licensing agency.

Carlson 2016 Released

November 29, 2015
[See below for 8-7-2015 update]

Carlson Software made the 2016 version of their desktop software available for download yesterday. The products released include all desktop products that run with the included IntelliCAD or on top of your own AutoCAD-based software. The 2016 OEM/embedded AutoCAD versions of Survey and Takeoff are expected to be released in a month or so.

The programs included in this release include Civil Suite, Takeoff Suite, Survey, Civil, Hydrology, GIS, Basic Mining, Geology, Underground Mining, Surface Mining, Natural Regrade, Field, CADnet, GeoTech, Trench, Construction and Point Clouds. Carlson 2016 includes IntelliCAD 8.1 and can also be

installed on top of any full AutoCAD-based software from 2010-2016. This includes AutoCAD, Map and Civil 3d but does NOT include AutoCAD LT.

You can see the full list of Carlson 2016 Improvements here.

One thing that's new for 2016 is that there are separate downloads for 32- and 64-bit systems. You can download the 150731 Build of either file here.

If you are currently on Carlson's maintenance plan, you can click here to find your 2016 serial number. You'll need your 2015 serial number and primary contact information for the owner of the software. If you have trouble, feel free to email me and I'll do what I can to help get you up and going.

Or, request a proposal to upgrade or renew your maintenance now.

I can provide a 30 day trial if you'd like to test-drive for a bit and am also offering a free test-drive to one of my upcoming webinars. Starting with tomorrow's Introduction to Carlson Software – Settings, Setup, Configuration & Points webinar, I'll be presenting in the 2016 software.

If you're curious how Carlson compares feature- and price-wise to Civil 3d, Land Desktop, Eagle Point, Terra Model or others, email me or follow these links to request a demo or request a custom proposal.

8/7/2015 Update: One other change to the platform support for Carlson 2016 will be important to a lot of you: Carlson 2016 with IntelliCAD no longer works on top of Windows XP; however, you can run Carlson 2016 on top of an AutoCAD 2010-2016 on an XP machine.

Carlson Software and Windows

10

November 29, 2015
Microsoft released the Windows 10 operating system for PCs this week and a lot of Carlson users have jumped to install the shiny (and free) new thing. I always recommend waiting a few weeks for kinks and bugs to be worked out before installing anything that affects all your program installations and can have such a big impact on your productivity. However, I've heard from a lot of you who've already tried it out with Carlson 2015 and even earlier versions. Most have had success but some have called or emailed with questions. I reached out to Carlson's tech support to ask what Carlson users can expect with Windows 10 – this is the response I received:

> *We have tested Carlson 2016 on pre-release Windows 10 and did not see any issues in limited testing. We expect to have 2016 compatible with Windows 10 when it ships. We may address some minor issues with Carlson 2015 if they arise, but not older versions.*

If you haven't renewed your maintenance plan or upgraded for awhile, now is really a good time. If you renew your maintenance now, before 2016 is released, you will get an immediate upgrade to 2015 and then will also receive the upgrade to 2016. Also, if your maintenance has expired, your cost to renew maintenance will increase once 2016 is released because you'll be an additional version behind. Click here to request a proposal for new licenses, for upgrades or maintenance renewals and find out what other goodies That CAD Girl includes with your purchase. Update: Carlson has now posted this to their website
